Extract from letter dated Hoboken, N. J.

November 16, 1898.

HYATT ROLLER BEARING CO.,
HARRISON, N. J.

GENTLEMEN:

* * * A year ago, after a preliminary test with your bearings at important points on our line shaft, we equipped all of our shafting with them. Indicator diagrams taken before and after installation, showed a large saving of power, and we immediately noticed a saving in the consumption of fuel. This saving has been continuous from month to month, and the total money value of the coal saved, has been over 25% of our total coal bill for the entire year, and has also, we are pleased to state, more than equalled the entire cost of the boxes.

* * * We have placed from time to time, a number of fuel saving devices in our factory, but have never before been able to show a saving of 100% per annum on their cost.

Yours respectfully,

NATIONAL CASKET CO.

(Signed), C. T. WETMORE.
